the New York Harbor. Reported for The New-York Tribune. FOURTEENTH DAY ...... THURSDAY, Sept. 1

After the minutes had been read over by the Judge Advocate, Lient . Carr was recalled, but previous to his examination the Judge Advocate read the deposition of Frederick B. Stewart, who is lying sick at Brooklyn, and unable to appear before the Court.

The deposition set forth that the witness copied one pape from a report in the hand writing of Lieut Hadson. The paper so copied bore date "U. S. ship Peacock, Sydney N. S. W., 3d March, 1840." Only one of the reports was in the hand writing of the witness and that was the one in which the word, "meening" was omitted. It will be re membered that the one containing the word "morning was sent to the Secretary of the Navy. The witness could not say in whose hand-writing the other paper was. The other portions of the deposition were unimportant.

Lieut. Carr being re-called, wished to state that "after : night's reflection, and having seen the books shown to him by the Judge Advocate, the men who were punished for stealing liquor on board the Relief on the 11th of July, and the men who deserted, were at San Lorenzo about nice days before the punishment took place,"

Q. What was the book shown to you by the Judge Ad BA. This book here, which purports to be an Abstract of

Panishments. It is not in the hand-writing of the Master-Mr. Hamilton complained of the Judge Advocate having

had private interviews with the witness. The Judge Advocate said he could have easily called a witness to contradict Lieut Carr, but he preferred showing the mistake that officer was under to him and letting him

explain the testimony himself Witness. The book produced is not in the hand-writing of the Master at-Arms. A book of the kind was kept by my order, but that is not the one.

Lient. Hudson re-called to make corrections. Witness. 1 stated the other day here, that those repor were both copied by Mr. Stewart, and that I stated with a firm conviction that it was so. I now find that he was some. times assisted by a Mr. Power, and who may possibly hav

copied one of them. By Mr. Hamilton. Q. Did Dr. Guillou keep a journal, as directed by the General Order of September, 1858?

A. I never saw a journal kept by him agreeable to that Q. Did you see a journal at any place-if aye, what was

A. I saw a journal at Hosoluiu. It was much mutilate. There were some leaves torn off. I think that was Dr Guillou's journal. I have no doubt about it on reflection. Q. About what number of leaves were torn out, as near

as you can guess? A. I can't say how many leaves were torn out. I think there were twenty that were written on. It was a small journal I think,

Mr. Hamilton here called on the Judge Advocate to produce the General Order issued by Lieut. Wilkes, dated a sea, on board the U. S. ship Vincennes, Sep 13th, 1838. As this General Order was published during the trial of Dr. Guillou, we do not deem it essential to republish it. It requires all the officers of the Exploring expedition to keep a journal of the cruitze, and to send the same to the commander of the ship to which he may be attached, weekly. This journal was not to be a mere log-book, but a diary, in which was to be noted all that relates to public information, being a record of all objects of interest, how-ever small, which may be seen during the croize, in the sc-entific or other departments; and the views of the officers ought to be briefly expressed concerning things which may come under their notice.

Mr. Hamilton next read a letter from Lieut. Wilkes, ad

dessed to the Commanding officers in the Squadron, direct ing them not to permit their pursers to pay out the extra pay to any officers who have not conformed to the General Order regarding a journal to be kept.

Q. Was the extra pay of Dr. Siccles checked because he

did not perform scientific duties?

A It was. The pay of three officers was checked; Dr. Guillou, Siccles and Lieut Pickney.

Mr. Hymilton read a letter from Dr. Guillon to Lieut Wilkes, which was published on the trial of Dr. Guillou

whices, which was published on the trial vi Dr. Guillon, in which the Dr. respectfully stated that the portions take, outreferred to private and personal matters of his own, an notio the accentific duties which he was to perform.

Lieut. Wilkes called, and examined by Mr. Hamilton—Q. Did you receive a letter signed J. K. Paulding, dated the 14th of July, 1858. If anye, have you made diligen tearch for that letter, and will you state it it is lost and cannot be found?

A. Lidi procedure up halter, and have searched carefully

A I did receive such a letter, and have searched carefully for it both before and since my return to the U. States, believe it has been mislaid or lost. Mr. Hamilton here offered a letter from J. K. Paulding to

Extract of a letter from the Hon. Secretary of the Navto the Commander of the United States Exploring Expedi tion, dated Navy Department, July 14, 1858:

Lient, Wilkes, dated 29th March, 1939.

"The officers of the Exploring Expedi ion will be allowed extra payequal to that received by those engaged in the service of the coast survey on consideration that they are employed on scientific duties." Signed J. K. Paulding. In obedience to the authority contained in the foregoing leiter from the Navy Department, the pursers of the Explor-ing Expedition will credit and pay to the officers attached to the same texcepting such as may be hereinafter design; led by me in writing) the following compensation graduated upon their allowances now made "to those engaged in the terrice of the coast survey" and allowed to the officers by

the authority of the Navy Department.

To the Commander of the Peacock \$1000 per annum in addition to his pay of \$2500 per annum as commander of a sloop-of-war.
To the Commanders of the Relief and Porpoise \$700 per anoum in addition to their pay as commanders of those vessels.

To all commissioned officers or those acting as such and duly appointed by the proper authority and to all acting masters two dollars per day in a ddition to their regular pay. To passed midshipmen one dollar per day in addition to

their regular pay.

To midshipmen er acting midshipmen duly appointed \$250 per annum in addition to their regular pay.

The pursers will inform the officers referred to in this order, that they are required to furnish themselves with the necessary instruments, books, &c. to enable them to perform

the scientific duties required of them in the various departments for which surpose and for the extra expenses and necessary certificates requisite for such a cruise, these al-lowances have been authorized by the Department and will be extended to the officers referred to while engaged on or inconnection with scientific duties in the Expedition. Signed CHARLES WILKES,
Commander Exploring Expedition Washington, Ju.y 15, 1838. Lieut, Hudson re-called .- Q. Did not Dr. Guillou stat

to you in May, 1840, that a medical officer could not make all the observations or record all the facts required by the order, and ask you to inform him what kind of facts besides his desired the property of the control of the con al department you would like him to put down what kind of a journal he was to keep, as he did not under thand the order in relation to Journals. I told the Doctor that the order in relation to Journals. I told the Doctor that the order was not a Midshipman in the ship who did understand it. I told him it was perfectly plain—it explained iself. He came in at that time to draw me into an argument, and I did not choose to be drawn into an argument. He did not say any thing about meteorological observations. Q. Did not the conversation alluded to take place a few

days after the order had been promulgated on board the Peacock?

A. It did not; it might have been six months.

Purer Waldron re-called.—Q. Do you remember having seen an original letter from J. K. Paulding on the subject of extra pay?—If aye, what is the date of the letter! A. I remember having seen the general instructions to Captain Wilkes, in which was contained authority to pay the officers of the Exploring Expedition extra pay equal to that received by those in the service of the Coast Survey, on condition that they were employed on scientific duties. To the best of my recollection, it bore date 14th July, 1838.

Q. Was the passage in Lieut. Wilkes's order of 15th July, 1838, as quoted, an extract from that letter?

A. It is.

The following letter was read: NAYY DEPARTMENT, 29th March, 1839.

Sir: The Department feels called upon to explain an act of lorgetfulness which, when it comes to your knowledge, may occasien you some surprise.

Shortly before the late session of Congress expired, Mr.

Mallory presented a resolution calling upon the Navy De partment among other things, for information whether any earra pay had been allowed the officers of the Exploring Squadron by authority of the Department. The reply was, that it had not, the Department having lost all traces of recollection of the letter to you dated 12th July, 1238, in reply to one of the 10th in which you stated that Mr. Poinsett had mised your officers the pay of those engaged on the

When it is recollected that the letter was written only 12

days after I came into the Department, obliged to copwith its laborious and complicated concerns under all the disadvantages of inexperience, the circumstance of its being so totally forgotten is perhaps not very surprising. I basten, however, in justice to you and myself, to explain this affair, and to express regret at this lapse of memory .-As, however, it is doubtful whether this Department possesses any authority to allow extra pay to the officers of the Expedition, the most prudent and advisable course will be to let it remain to their credit on the Porser's books unti-

Q. Were you armed, and what protection had you from your countrymen.

I was entirely naked and had no protection whatever The hoats were outside the surf, near 50 feet distant, and

had to swim to them. After I had got off to the boat several shot were fired at the natives. One gun from Mr. North; previous to that two or three shots had been fired from Capt. Wilde's boat. Capt. Wilkes fired first, and on of the natives ran down immediately to the reel to wash the shot out. He was hit in the face. Mr. Peale then fired, and I think struck a native in the leg. I think Mr. Peal fired a second time, but I cannot be positive. The natives then retired slowly up the beach, two of them having bold of one of the men who was shot, and who appeared to

SANDS'S SARSAPARILLA.—This Medicine has already per-formed some almost incredible cures of diseases arising from impurities of the blood and general system. It has arrested and cured numerous cases of scrofulous affections, diseases of the kin, rheumatic gout, diseased liver, painful enlargement of the knee, elbow, and wrist joints, chronic heumatism, sore throat, and chronic constitutional dis

orders.

The testimony of those who have been cured by its use, with their residences, has been published from day to day, and were it desirable, a mass of the most overwhelming testimony could be brought forward, proving most conclusively its inestimable value, as an active curative medicine

Sands's Sarsaparilla.—This preparation is a combination heretofore unknown in the history of medicine, differing entirely in its character and operations from the various preparations of Sarsaparilla which have been at different preparations of Satsaparina which have been at macchines offered to the public. It acts specifically upon the whole system, thereby bringing it under its direct and immediate influence. Although possessed of powerful and control ling effects, yet it is entirely harmless, so that it cannot injure the most delicate constitution. It has been thoroughly tested in numerous instances, both in health and in disease. When in perfect health; no effect is produced by its use ex cept an increase of appetite; but when disease is seated in the frame and harrying fast its victims along the path of life, then its mysterious influence is felt and seen; it enkinthe, then its mysterious influence is left, and seen; it enkindles new life and vigor, and brings health and strength back to the suffering and diseased. Read the case of Thomas Turner and others, contained in an article addressed to the World, and all doubts of its efficacy must vanish as chaff before the wind.

Astruth is the best of apologies, here its: I aver that I, with the view of conciliating tamily prejudices, inadvertently adhibited my name to a paper reprejudices, inadvertently adhibited of that put is my hand and sented to me as a true duplicate of that put is my hand and hurriedly scanned over, but in its nature opposite in meaning, and with deep-draught policy entirely faisined. Such being the case, I repeat the same, and adhere to all other previous assertions as true and correct.

in one operation with more case and greater facility that a single letter with an ordinary pen and link.

To the mercantile, professional and traveling part of the community this truly great invention is of infinite value as it is a great saving of TIME, TROUBLE and SAPENNE. The principal advantage to be derived from the manifold writer is, that a copy of any decrument may be kept without any additional trouble to the writer, and without any necessity of using either an inkstand or a pen. The instrument used for printing is an agate roll, consequently it never wears by writing is an agate point, consequently it never wears by use. For banks, insurance offices, merchants, men of business generally, lawyers, postmasters, editors, reporters, public officers, and all who may be desirous of preserving copies

of their letters, documents, &c. with an immense saving of time and the satisfaction of having an exact copy of what they have written, this will be found invaluable. Francis's Manifold Writer has now been in successful operation two years, during which time the proprietor has had the pleasure of receiving the unfeigned approbation of all whose observation it has come under. At the law fair of the American Institute the merits of the article were examined into by three of the most able chemists in the country who pronounced it to be a very ingenious and useful contrivance, and not liable to change color by exposure to air, moisture, or chemical agents. Consequently a medal was

awarded by the Institute.

The proprietor has lately made great improvements in this article. The paper is of the best quality manufactured in the United States, being made for the Manifold writer expressly to his order. The ruling of them, which has to some time been thought impossible, has at length been brought to perfection for which acopyright has been secured. The copying books are bound in a variety of forms and sizes, varying in price from 50 cents upwards.

Stationers and Country Merchants in general will find it to their advantage to procure the article, as they meet with a ready sale.
